I think the excitement of the past few weeks was the emptying of the fish dam resulting in the harvesting of 3 x 200litre drums of fish. All our workers and the teachers of the primary and secondary schools were able to make lists and take the fish on tick to pay when the wages come through, The road workers who are based at present here at Katoka were delighted to have fresh fish for a change to their diet buying over 80 kilos for all their workers. It was really nice that Josh and Keri who had come from Lubumbashi for a couple of weeks were able to see the process and Keri and I did a noble job together in the selling department.

Thank you for continuing to pray about Zango's situation....things seem to have gone quiet at the moment and as far as hospital is concerned we will review things in January. They value your support and prayers.

Sandy saw Zango and his wife recently at Dilolo Gare .

Some of this years sponsored children receiving their stationery packs.

This is Roger one of those sponsored who has passed the state finals and came with gifts to say thank you.....a chicken, onions, and pineapples.

I mentioned the road people, well, they are doing a great job, this is the view just outside the hospital gates looking westward towards Dilolo. And they hope to get to Dilolo by Christmas if the rains are not too heavy and hinder them.

PRAISE for :-

1. **Continued freedom from COVID**
2. **The massive improvement in the roads**
3. **For help with some difficult maternity cases**
4. **For the supply of 25 sacks of cement brought in by 3 wheeler from Dilolo**

PRAY FOR :-

1. **The ongoing Zango situation**
2. **Safety for travel for Sandy as she returns DV next week from Kolwezi.**
3. **Josh and Keri as they return and settle in to life in Lubumbashi**
4. **For our Christmas outreach programs and the New Year Conference. That we will all be challenged as we consider what has taken place here recently and as we face up to what God wants for the future.**

Well Sandy is off on her travels again she has gone to Kolwezi to stock up on medical supplies mainly, although there were one or two things on her list for the school building program too, ridging and guttering to complete the roof, and anti-rust roofing paint as that is another task we are doing at the moment hoping to prolong the life of the roofing on some of our older buildings and also to improve their appearance.

EVERY BLESSING WITH
LOVE MARY
